Leveraging Influencer Marketing

If you've ever started using a service or product after someone you trust had recommended it, then you intuitively understand how influential word of mouth can be. User-generated content (UGC) is essentially your brand's digital word of mouth. If you're a brand selling on Amazon, your UGC is any shared content about your product, usually social media posts or reviews on the marketplace, created or curated by individuals rather than by you as a brand. This includes content by digital creators, who continue to build their substantial following as authority figures of their domains.
